Professional Summary

Computer Science graduate with a strong interest in AI, Data Science, and Machine Learning, supported by academic projects and practical experience in software and web development. I am passionate about building data-driven solutions, contributing to impactful work, and continuously developing my technical and professional skills in an innovative environment.

Experience

Software Development Intern, Kwaidi Company 06/2024 – 08/2024

- Developed internal interface features using Vue.js, HTML, CSS, and JavaScript
- Integrated APIs to support application functionality and data exchange
- Collaborated with developers and designers on UI/UX workflows using Figma

Education

Bachelor of Science in Computer Science 08/2020 – 05/2025 | Dammam, Saudi Arabia
Imam Abdulrahman Bin Faisal University
GPA: 4.2/5.0

Projects

MetaForm Gym | React, TypeScript, Node.js, Express, PostgreSQL, AWS 2026

- Built a full-stack fitness platform with secure authentication, workout tracking, calorie tools, customizable plans, and responsive analytics dashboards
- Implemented body-weight and strength analytics, including forecasting, plateau detection, and personalized workout and calorie recommendations

ML Detect | Python, Scikit-learn, Machine Learning, React 2025

- Built a DDoS detection pipeline using CICDDoS2019, reducing approximately 50 million records to one million balanced samples through preprocessing and feature engineering
- Evaluated six ML models; Decision Tree achieved 99% accuracy and a 99.5% F1-score, while Random Forest and SVM achieved approximately 98.8% accuracy

VPN and Non-VPN Traffic Classification | Python, Machine Learning, Scikit-learn, Pandas 2025

- Built an ML pipeline to classify 33,711 VPN and non-VPN network flows, addressing a 1.1% minority class using SMOTE and normalization
- Evaluated 11 models across three preprocessing phases, achieving 95–96% F1-scores, with Random Forest, LightGBM, and CatBoost delivering the most consistent results

Skills

Technical Skills

- **Programming:** Python, Java, JavaScript, PHP, and SQL
- **Data Analysis & Visualization:** Excel, Power BI, Pandas, NumPy, and Matplotlib
- **Machine Learning / AI:** Scikit-learn, Data Preprocessing, Classification, Predictive Modeling, Feature Engineering, and Model Evaluation
- **Web Development:** HTML, CSS, Vue 3, and React

Soft Skills

Fast learner, Teamwork, Communication, Time management, Adaptability

Certificates

IBM Data Science Professional Certificate | 2026
